HIGHER MILK PRICES IN SEVERAL MARKETS IN JANUARY

January fluid milk prices are higher in several scattered markets according to reports received by the Bureau of Agricultural Economics. Included in the list of cities where upward changes have occurred in producer or consumer prices are Indianapolis, Grand Rapids, St. Louis, Seattle, the Twin Cities, Huntington, W.Va., and Phoenix, Arizona. A 35 cents percent increase on the Class I price has been effective at Indianapolis since December 16 and a 1 cent per quart retail advance was made January 5. This market is now operating under the State Milk Control Board. The increases at Grand Rapids are 20 cents per cwt. and 1 cent per quart, respectively on Class I and retail sales. At St. Louis retail prices which were 11 cents per quart in February are 11 - 12 cents this month. A new Federal marketing agreement and order is pending for that market, although not finally approved. The Seattle increase is limited to retail prices only, which are 1 cent

per quart higher than in December. Class I milk is 30 cents per cwt. higher this month than last at Huntington, W.Va., and retail prices for at least part of the supply have gone up 1 cent per quart. Class I milk at Phoenix, Arizona, is 9 cents per cwt. higher than in December and in this market also, part of the retail supply is a cent per quart higher. A slight increase, amounting to 10 cents per cwt. is effective at the Twin Cities, and at Wausau, Wis., there is a Class I increase of 7 cents per cwt. The Tulsa, Oklahoma, Federal license was terminated December 31 after having been suspended since the middle of October, and reports indicate that a flat price plan is now being followed there. This price, which will apply to all milk sold to dealers paying on that basis, is 28 cents per cwt. less than the former Class I price, which applied only to milk utilized in fluid form. Tulsa retail prices are down 1 cent per quart, this being the only market for which a decrease was reported in January.

FEW CHANGES IN FEBRUARY MILK PRICES

An increase of milk prices occurred at Boston with the issuance of the new Federal order which became effective February 9. As of that date Class I milk F.O.B. Boston advanced 33¢ per cwt. to \$3.27 (3.5% milk), and country plant prices advanced 42¢. Boston retail prices were scheduled to advance 1¢ per quart February 12. The Boston change was the largest reported to the Bureau of Agricultural Economics this month. Cleveland, Ohio and Portland, Ore. are other points where prices are higher than in January, Class I milk advancing 23¢ and 21¢ per cwt. respectively, while retail prices are 1¢ higher at each place. A new Federal order

is in effect at St. Louis, under which a slightly modified plan of establishing producers' prices is to be followed. The announced Class I for February is 15¢ lower than January, although the effect of the new plan of individual distributor pools upon net payments to producers is not known at this time. Several changes have been made in the Pennsylvania territory as a result of recent rulings of the State Milk Control Board, one of which was to narrow the differential between F.O.B. and country plant prices in the Philadelphia area, and another was to increase the price of milk used for cream. Such other price changes as occurred in scattered markets were minor. The Federal license at Atlanta, Ga. was suspended, and the Evansville, Ind. license terminated during the past month.

MILK PRICES MOSTLY UNCHANGED IN MARCH

Despite the more or less unsettled tone
which has been a feature of March butter
markets, relatively few changes of fluid milk
prices have occurred. The downward trend of
butter prices, which is partly seasonal, is in
close resemblance to that of last year. Pro-
duction is apparently heavier than in 1935 at
this season, but supplies of manufactured
products are for the most part low in relation
to average, and markets though unsettled, are
not weak.

In the case of fluid milk fewer price
changes are reported effective in March than
for several months. The Chicago plan of basing

fluid milk prices upon those paid by condenseries
operating in the territory is still being follow-
ed, although the differential over the condensery
price will be 30 cents per cwt. for March milk
instead of 50 cents as formerly. Two cities
have lower prices this month, namely Salt Lake
City, Utah, and Tulsa, Okla. In each case, the
reductions are 24 cents per cwt. on Class I milk,
and 1 cent per quart to retail trade. There is
a Class I decrease of 9 cents per cwt. at Little
Rock, Ark. Slight increases on Class I milk only
are in effect at Seattle, Wash., and Phoenix,
Ariz. Retail prices are 1 cent per quart higher
at San Diego, Calif., but a cent lower at Low
Angeles, California.

MILK MARKETS MOSTLY QUIET - FEW PRICE CHANGES

June milk markets show relatively few
price changes. Lawrence and Lowell, Mass.
prices are 1 cent per quart lower on both
Class I and retail milk. The proposed Class I
change at Boston, however, as per amendment to
the Federal license tentatively approved last
month by the A.A.A. has not yet taken place.
Other price reductions reported include:
Kansas City, Kansas, 12¢ per cwt; Kalamazoo,
Mich., 5¢ per cwt; and Grand Rapids, Mich., 15¢
per cwt for part of the supply. Of the several

increases, the largest is 50¢ per cwt in prod-
ucers prices at Knoxville, Tenn., and a 2¢ per
quart increase to consumers for milk delivered
to homes. The latter price is now 12¢, but
store prices remain at 10¢. Class I milk is
reported 7¢ per cwt. higher at Seattle, and 9¢
per cwt. higher at Phoenix, Ariz. The modified
plan at Chicago provides for a minimum price of
\$1.625 per cwt. on Class I milk if the previously
used plan of 30¢ over average condenser prices
results in an amount less than that. This was
put into effect on May 1 and the price of \$1.625
applied to May.
